

CompuClean PDA Specifications –Updated 1-6-2010

Below is a list of PDAs that are compatible with CompuClean. In addition, we also recommend at least a Pentium III computer running Windows 2000 or later.

As of March, 2007 CompuClean PDA is compatible with **devices running any version of the Windows Mobile 5 or 6 operating system with a touch screen**. This includes many stand alone PDAs as well as some PDA phones. Remember, the device **MUST** have a touch screen.

The Windows Mobile devices below are readily available. Devices in *italics* have been tested with CompuClean.

We would recommend one of the following models:

ASUS and Pharos

ASUS MyPal A626 Ultra Slim PDA

Pharos Traveler 535e

Pharos Traveler 535+

The above models are available through various online retailers.

HP

HP IPAQ 110 Classic

HP IPAQ 210 Enterprise Handheld

Available through [HP](#)

Phones

You can find a list of Windows Mobile phone models that are available [here](#). The list can be filtered by carrier. Make sure that the Touch Screen option is selected.

Please feel free to contact the CompuClean help desk at 1-800-897-5551 for further assistance in selecting a PDA to use with CompuClean.
